

## Specific daily interruptible capacity service

### Use of daily interruptible capacity

The Storage Service User is entitled to over- nominate the capacity (booked and/or purchased in secondary trading) available to the User for the Gas Day, up to the maximum technical capacity available on the Gas Day in the Underground Gas Storage. The Storage Service Provider determines the daily interruptible capacity to be provided to the Storage Service User by taking into account the nomination allocation rules specified in its Business Code.

### Fees for daily interruptible capacity booking

$T_{n0}=0,00077817$  EUR/kWh/day (valid from 12.04.2023.)

The Storage Service Provider will determine the fee to be paid by the Storage Service User for the relevant month, which will be invoiced to and paid by the Storage Service User in accordance with its terms and conditions of the Business Code, as the product of the quantity of natural gas traded using the daily capacity in the relevant month multiplied by the above unit fee.

The Storage Service Provider will determine the fee to be paid by the Storage Service User for the relevant month, which will be invoiced to and paid by the Storage Service User in accordance with its terms and conditions of the Business Code, as the product of the quantity of natural gas traded using the daily capacity in the relevant month multiplied by the above unit fee. The Storage Service User shall also pay the turnover ("injection/ withdrawal") fee specified in its natural gas storage contract for the quantity traded using the daily interruptible capacity.
